Yanjun He

Target: HR Intern (Recruiting / HR Digitalization)

Shanghai • Class of 2027 (BA, in progress) • Start date negotiable · 5 days a week · 3+ months • Phone: 19921552388 • Email: 2806660493@qq.com • Portfolio: chiwawafromkk.github.io/en/hris

> HR digitalization intern at Danaher, where I built and handed over a batch record-filling workflow with Excel, Copilot and Power Automate; now a recruitment consultant intern at IntelliPro, supporting the full recruiting cycle.

EDUCATION

Shanghai Lixin University of Accounting and Finance — **BA, Administrative Management** — Sep 2023 – Jun 2027 (expected)

English: CET-6 550; CET-4 passed

Honors: First Prize, University-level Student Innovation and Entrepreneurship Project (generative AI campus study, team lead)

INTERNSHIP

IntelliPro **Recruitment Consultant Intern** — Oct 2026 – present

- **Full recruiting cycle**: Understood client roles and rewrote job titles and postings; searched and screened résumés against the JD on job platforms and reached out to candidates; ran phone screens, scheduled interviews and followed up.
- **Engineering roles**: Worked on electrical, HVAC and cooling roles for data centres and AI computing centres, turning each JD's hard requirements into a screening card and must-ask phone-screen questions.
- **Compliance**: Checked every candidate against the clients' off-limits list before screening.

Danaher (Shanghai) Enterprise Management Co., Ltd. (dispatched via Xindefu) — **Project Specialist, HR Digitalization** — Mar 2026 – Aug 2026

- **Employee master-data governance**: In a CDP master-data system covering 6,000+ employees in China, checked and updated master data for about 2,000 employees; worked with regional HR teams to chase missing or abnormal records and get files completed.
- **Batch record-filling workflow**: Designed and used a batch workflow: Copilot reads scanned forms, Power Automate looks up by employee ID and enters the data, Excel holds it; anything unreadable or incomplete goes to a person, and every 100 files are all re-checked by hand.
- **Delivery and throughput**: Approved by company IT and my mentor, ran in the company environment and was handed over to my mentor; measured 400+ files a day including manual review, against about 100–200 a day by hand.
- **Records and compliance support**: Filed labour contracts and helped with rehiring and new-hire records; took part in compliance checks, organising and analysing data in Excel and producing visual reports; recognised by the HRBP and invited to extend the internship.

CAMPUS

Shanghai Lixin University of Accounting and Finance • New Media Operations Department — **Member** — Sep 2023 – Jul 2025

- Wrote articles for the official WeChat account, and handled the student-information entry system and campus-card services.

Shanghai Lixin University of Accounting and Finance • Student Union — **Member** — Sep 2023 – Jul 2025

- Planned and organized the year-end event and other departmental events, coordinating resources to keep them moving.

PROJECTS

Personal Job Agent GitHub — **Product design • use • acceptance** — Aug 2026 – present

- Designed and accepted a Windows local-first job-search agent for finding roles, checking the evidence for each match, preparing materials and tracking progress. Principle: cite only confirmed facts, and let the person decide on final submission. Front and back end built with AI coding tools such as Claude Code.

Generative AI Campus Application Study — **Team lead • First Prize, university-level innovation project** — Mar 2024 – Jul 2024

- Compiled cases, designed the questionnaire and ran the statistical analysis; co-wrote the report and paper, and made the slides and the defence; collected 300+ valid responses.

SKILLS

Office & data: Excel (PivotTables, functions, charts); Python (Pandas, NumPy); SQL (basic); Microsoft 365 Copilot, Power Automate.

AI tools: ChatGPT, Claude Code, Gemini, Kimi, DeepSeek, GLM.

Other: Community waste-sorting volunteer (Mar–Jun 2026, 50 hours recorded on the volunteer platform).
