

YanJun He

Target roles: AI Product Operations | LLM Prompt Assistant | HR & Talent Data Operations

+86 199 2155 2388 | 2806660493@qq.com | Shanghai | Portfolio: chiwawafromkk.github.io

Class of 2027 (BA) | Available now | 5 days a week | 3+ months

EDUCATION

Shanghai Lixin University of Accounting and Finance | BA, Public

Sep 2023 – Jun 2027 (expected)

Administration

- Core courses: Human Resource Management, Management Psychology, Organizational Behavior, Management Information Systems.
- English: CET-6, 550. Comfortable reading English material and handling cross-border business email.

INTERNSHIP

Danaher (Shanghai) Enterprise Management Co., Ltd. (Fortune 500) | HR & Talent Data

Mar 2026 – Jun 2026

Intern

Placed through 薪得付信息技术（上海）有限公司 (staffing agency); service period Mar – Jul 2026 — one internship.

- **Master data at scale:** On the CDP HR core system covering 6,000+ employees in China, independently reviewed and batch-validated employee master records for about 2000 employees (2,000+ key fields), keeping HR data complete and accurate.
- **Cross-regional coordination:** For missing or abnormal documents across regional branches, worked with dozens of regional HR contacts, built a standard chase-and-backfill tracker, and followed up labor-contract filing and new-hire records.
- **Compliance and reporting:** Helped review safety-compliance rules and checks; produced multi-dimensional statistics and visual reports with advanced Excel functions and PivotTables for management and team reviews.
- **Recognition:** On my own initiative, brought AI office tools into document summarizing and data cleaning; gradually took over CDP maintenance and broader HR operations; recognized by the HRBP and invited to extend the internship.

PROJECTS

Personal job-search assistant on LLMs and a local workflow | Product planning & prompt design

Aug 2026 – present

- **Problem and scope:** For non-technical job seekers facing low-yield mass applications, slow extraction of key job requirements and generic outreach, planned an end-to-end workbench from job collection and structured parsing to personalized materials.
- **Prompt engineering:** Built on DeepSeek; designed a prompt pipeline for extracting information from Chinese job descriptions; iterated three outreach templates (skills match / ready to contribute / self-driven growth), optimizing for first-reply rate.
- **Safety by design:** "AI prepares, the person decides" — sensitive data stays local and private, with a hard-pause mechanism balancing automation and privacy.

Generative AI in campus and office use — empirical study | Team lead, student innovation project

Mar 2024 – Jul 2024

- Led the team studying generative AI in study and office scenarios; collected domestic and international tool cases; built the survey framework and led data cleaning.
- Summarized findings with cross-tab statistics, wrote a report of about 10,000 Chinese characters and presented at the defense; the project won First Prize in the university's student innovation programme.

CAMPUS & SKILLS

Student Union, New Media Operations | Core member

Sep 2023 – Jul 2025

- Planned topics, wrote and laid out WeChat official-account posts; supported publicity and coordination for large campus events.
- Skills: Excel (VLOOKUP/XLOOKUP, PivotTables, charts), advanced Word layout; SQL basics; Python data libraries (Pandas/NumPy). Completed Alibaba Cloud "AI New Force" training.
